Children in Ancient Greece

Life as a child today:Life today is that everyone including girls can go to school.You can go school on monday to friday and miss saturday and sunday to do homework.Childrens learn english,maths and all other things so you can learn and get better at things.We play on any electronics and toys so we can entertain ourselfs without getting bored.Also we earn pocket money so we can sometimes buy toys ourself or anything needed.

Ancient Greek School: In Ancient Greek you have a private tutor however, some people can afford to educate. Fascinatingly ,they didn't do math but they do poem writing and sports also, learning how to play music. When they are seven they will get educated another 7 years, that will make them 14 years old.

Ancient Greek home life: In Ancient Greek, houses were normally built around a courtyard or a garden. Surprisingly the houses are made from wood and mud bricks. They had small windows with no glass. Also they had wooden shutter to prevent the sun from coming in to blind them.
